INDEX.

AËRIAL navigation, 140
Aëro steam-engine, 563
AIRY, G. B., "A Treatise on Magnetism" (review), 262
Allophane, mineral, 543
Aluminium substituted for platinum in batteries, 115
Aluminous iron ores, 539
Ammonia engine, 425
— solvent power of, 127
ANGSTRÖM, J. A., spectrum of aurora, 112
Aniline dyes, tinctorial power of, 128
Animal mechanics, 397
"Annual of Scientific Discovery" (review), 535
Aplanatic searcher, 419
Aqueous vapour, transferation of by leaves, 296
ARMOUR, J., "Iron and Heat" (review), 378
— "Power in Motion" (review), 530
Armour and guns, 543
Arsenic, distinguishing from mercury, 407
Arsenical sulphide, 131
Arseniferous hydrochloric acid, 551
Arseniuretted hydrogen in sulphuretted hydrogen, 552
Artillery, French, 291
Ash, incineration of fusible, 552
"Astronomy Simplified for General Reading" (review), 535
Atmospheric germs, theory of, 153
Aurora, spectrum of, 112
Autumnal foliage, tints of, 64

BALANCE floating dock, 393
Balloon navigation, 139
BANNISTER, S., "Classical and Prehistoric Influences upon British History" (review), 369
BARKER, Dr., illumination of microscopic objects, 273
BARKER, E. D., railway brake, 293
Barometer, manual of, 281
Barometrical predictions of weather, 123
Battery, improved DANIELL'S, 122
BEALE, Dr., on high power definition, 114
"Beginning; Its When and How" (review), 527
BELL, I. L., chemical phenomena of iron smelting, 289
Bengal lights, 548
BENNETT, A. W., on cross fertilisation and self fertilisation, 296
BIDDER, S. P., new safety lamp, 288
Binocular microscope, erecting and others, 417
BLANFORD, Mr., normal rainfall of Bengal, 281
Blast-furnace, improved, 138
Blood spectrum, method of detecting, 554
— test for, 401
Bohemia, diamonds from, 131
Boilers, durability of, 141
Boiling of liquids, 115
Boiling-point of mixed liquids, 405
Bones of men who made flint implements; where are they? 327
BÖTTGER, Dr., glue which stands moisture, 130
BOYD, C. B., new reflecting telescope, 107
Brakes, railway, 293
Brass and iron uniting, 547
— coating with copper, 411
— electro-deposition of, 116
Brazil, geology of, 295
Break, automatic, 559
British rocks and minerals, 286
BROCKBANK, W., effect of cold on iron, 289
Bromine, action of heat on, 555
BROWNING, J., automatic spectroscope, 110
— chromo-lithographs of spectra, 272
— direct vision spectroscope, 271

CACAO as food, 401
Caissons, stone, 544
CAPRON, J. R., spectrum of aurora, 112
"Captain," loss of the, 140
— stability of the, 544
Canals, ship, 293

CARTER, H. J., fossil sponge, 275
Charpie, microscopic examination of, 113
Chemical change, heat, and force, relations between, 77
Chemistry and mineralogy, relation between, 286
Chili, climate of, 282
Chloral, spontaneous decomposition of, 552
Chloroform, test for, 127
Chronograph, electro-magnetic, 563
CHURCH, A. H., ingenious application of spectroscope, 272
— spectrum of aurora, 112
— on the jacinth or hyacinth, 287
"Civil Engineers' and Contractors' Estimate and Price Book" (review) 258
CLARK, L., and R. SABINE, "Electrical Tables and Formulæ" (review), 376
"Classical" and Pre-historic Influences upon British History" (review), 369
CLELAND'S steam jet gas exhauster, 395
Climates of Straits of Magellan, Bear Island, &c., 124
Coal, consumption of, 136
— cutting machinery, 137, 288
— exhaustion of in England, 538
COCKBURN-MUIR, J., iron permanent way for railways, 293
Cæruleolactine, mineral, 542
Coffee as food, 401
Cohesion figures, projection of on a screen, 560
Cold, action of on iron and steel, 422
— effect of on iron and steel, 288
Colloid silica, microscopic crystals in, 275
Colours on metals, 411
Combustion, reciprocal, 555
— spontaneous, 115, 423
"Complete Course of Problems in Practical Plane Geometry" (review), 533
Condensation of humid air, 421
Condenser, secondary, 559
Coniine, artificial, 401
COOKE, M. C., "Handbook of British Fungi" (review), 537
Copper, coating brass with, 411
— new precipitant for, 551
— plates, action of nitrate of silver on, 551
— pyrites, treating, 290
Cornish miners, health and longevity of, 539
Cornwall, Miners' Association of, 390
Corona, solar, 227
COMBER, T., mining schools, 136
COX, Serjeant, on a new force, 347
CREDNER, H., crystalline form of carbonate of lime, 132
Cretaceous epoch, duration of, 294
CROOKES, W., experimental investigation of a new force, 339
— researches on psychic force, 471
— "Select Methods in Chemical Analysis (chiefly Inorganic)" (review), 381
Cross fertilisation, 296
Crystals, fluid cavities in, 285
CULLEY, R. S., "A Handbook of Practical Telegraphy" (review), 533
CUNNINGHAM, R. O., "Notes on the Natural History of the Strait of Magellan" (review), 255
Czernowitz bridge, 395

DANIELL'S battery, improved, 122
DANVERS, F. C., on the theory of irrigation, 35
— pneumatic transmission, 305
DARWIN'S "Descent of Man" (review), 248
DAVIES, A. M., "The Meteoric Theory of Saturn's Rings" (review), 380
DAY, ST. JOHN V., "Papers on the Great Pyramid" (review), 372
Dawn of light printing, 297
DAWSON, Principal, on the oldest known tree, 295
Definition, microscopic, high power, 113
"Descent of Man" (review), 248
DESCHANEL, A. P., "Elementary Treatise on Natural Philosophy" (review), 259, 534
Diaphorite, mineral, 541
Diamagnetism, new experiments in, 120
Diamond, discovery of *in situ*, 541
Diamonds from Bohemia, 131
— in New South Wales, 287
— — South Africa and New South Wales, 130
Diatoms, mounting, 276
"Dictionary of Science" (review), 257
DINES, Mr., on evaporation gauges, 281
"Disorders of the Nervous System in Childhood" (review), 377
Dock, balance floating, 393
Docks at Malta, 393
DONALDSON, W., "Switches and crossings" (review), 534
Dynamite, 549

EARTH-EATING, 127, 401
Eclipse of last December, 227
Electric currents through rarefied atmospheres, passage of, 279
— hygrometer, 556
— light, 115
— — for coast service, 413
— — in war, 111
— pyrometer, 431
Electrical pyrometer, 119
"Electrical Tables and Formulæ" (review), 376
Electro-dynamic engines, 77
Electrolytic decomposition, laws of, 556
Electro-magnet, remarkable, 560
"Elementary Treatise on Natural Philosophy" (review), 259, 534
"Elements of Plane and Solid Geometery" (review), 531
ELGER, Mr., spectrum of aurora, 112
Embrithite, mineral, 286
English guns, material for, 291
Eosite, mineral, 409
Eozöon canadense, 294, 418
ERICSSON, Captain, solar engine, 140
Evaporation gauges, 281
Exhibition, International, scientific inventions at the, 562
Explosions, spontaneous and accidental, prevention of, 549

FAIRBAIRN, Sir W., effect of cold on iron, 289
— on steam-boiler legislation, 214
FARMER, M. G., fusion of iridosmine, 115
FERRIE, Mr., improved blast furnace, 138
Fibres, mixed, in fabrics, test for, 129
— vegetable, 419
FIDDIAN, Mr., microscopic lamp, 275
Field gun, 392
Filter pump, new, 129
Filtration, porous cones for, 550
Fires, coloured, 548
— extinction of by gas, 422
FISCHER, J. G., effects of lightning, 115
Flax lint, microscopic examination of, 112
Fluoride, new, Ralstonite, 543
Foliage, tints of, 64
Food, economy of, 128, 401
FORBES, D., iron producing districts of Sweden, 391
Force, heat, and chemical change, relations between, 77
— new, experimental investigation of a, 339
FOWLER, G., smelting iron ores, 290
"Fragments of Science for Unscientific People" (review), 379
Freieslebenite, mineral, 541
FUCHS, C. W. C., on earth-eating people, 127
Fuel of the sun, 435

GAHNITE, analysis of, 286
GALTON, F., on barometrical predictions of weather, 123
Galvanometer, new, 430
— reflecting, adaptation of, 430
Gauges, railway, 141
Gas, crucible furnace, 404
— exhauster, steam jet, 395
— regulator, 115
"General Outline of the Organisation of the Animal Kingdom" (review), 254
Geography, physical, 124
Geological problem, 327
"Geology," by J. MORRIS (review), 258
Germs, theory of atmospheric, 153
GIBBS, W. B., spectrum of aurora, 112
Gümbelite, mineral, 409
GINSBURY, C. D., "The Moabite Stone, a *fac simile* of the Original Inscription, with an English Translation, and a Historical and Critical Commentary" (review), 371
Glass, microscopic, cleaning, 274
Glue and tungstic acid, elastic compound of, 129
— which stands moisture, 130
Glycerine, boiling of, 406
— and water, freezing-points of mixtures of, 424
GREENISH, T., microscopic examination of lint, 112
GRUBB'S automatic spectroscope, 270
GRUBB, Mr., compound prisms, 271
Gulf-stream, effects of, 294
Gun-cotton, experiments with, 129
Guns and armour, 543
— field, 392

HAIG, Captain, mounting diatoms, 276
"Handbook of British Fungi" (review), 537
"Handbook of Practical Telegraphy" (review), 533
HANN, Dr., climate of South America, 125
HASKOLL, W. D., "Civil Engineers' and Contractors' Estimate and Price Book" (review), 258

HAUGHTON, S., on animal mechanics, 397
Heat, electrical equivalent of, 277
— force, and chemical change, relations between, 77
— regulator, 115
HEISCH, C., organic matter in water, 127
HENNAH, T. H., photographs, 274
HENWOOD, W. J., on metalliferous deposits and on subterranean temperature, 390
HIGHTON, Rev. H., on relations between chemical change, heat, and force, 77
Hæmatite ores, 539
— iron ore, distribution of, 390
HOFMANN, Dr., a page of scientific history, 145
— test for chloroform, 127
— tinctorial power of aniline dyes, 128
HOPKINSON, J., on Mr. Highton's electrical equivalent of heat, 277
HUGGINS, Dr., on a new force, 347
— registering spectroscope, 272
HUNT, J., Diamonds in New South Wales, 131
HUNT, R., mineral statistics, 135
HUXLEY, Professor, on high power definition, 114
Hydrochloric acid, arseniferous, 551

ICE, lasting properties of, 114
Illumination of microscopic objects, 273
Indigo, solvents for, 404
Induction-coil, large, 558
International Exhibition, scientific inventions at the, 562
"Introduction to the Study of Inorganic Chemistry" (review), 262
"Introductory Text-book of Zoology" (review), 370
Iodine, dichroism of, 552
Iridosmine, fusion of, 115
Iron and brass uniting, 547
"Iron and Heat" (review), 378
Iron and steel, effect of cold on, 288
— — — Institute, 289
— burnt, 391
— deposition of on poles of a magnet, 122
— manufacture of in the hæmatite district, 540
— ore, hæmatite, distribution of, 390
— ores, reduction of, 137
— — smelting, 290
— permanent way for railways, 293
— Russian sheet, 540
— Sherman process for purifying, 391
Iron smelting, chemical phenomena of, 289
— water pipes, protection of, 411
Irrigation, theory of, 35

JADE, or nephrite, 543
JONES, T. R., "General Outline of the Organisation of the Animal Kingdom" (review), 254
JOULE, Dr., effect of cold on iron, 289
JOUSSET, Dr., venom of scorpion, 128

KENNGOTT, Professor, microscopic examination of obsidian, 132
Kent's Cavern exploration, 295
Kistnah viaduct, 394
KLEIN, Dr., electrolytic iron, 128
KNOWLES, Sir C. F., on screw propellers, 394
KUNDT, A., boiling of liquids, 115

LACQUER, Chinese, 130
Lamp, microscopic, 275
LANG, F. H., mounting diatoms, 276
Lantern, vertical, 560
LAUGHTON, Mr., physical geography, 124
Lead smelting furnace, 138
Leaves, transportation of aqueous vapour by, 296
LEEDS, Professor, American correspondence, 558
"Lessons in Elementary Physics" (review), 261
Light, action of on colours of insects, 414
— — — — salts of silver, 413
— electric in war, 111
— printing, dawn of, 297
"Light Science for Leisure Hours" (review), 378
Lightning, effects of, 115
— spectrum of, 553
Lime, carbonate of, crystalline form of, 132
— light for microscopical illumination, 553
LINDSAY, Lord, new experiments in diamagnetism, 120
Lines in glass, optical appearance of, 419
Lint, microscopic examination of, 112
Lithia minerals, testing in spectroscope, 407
LOWNE, B. T., spontaneous generation, 113
LYELL, Sir Charles, "The Student's Elements of Geology" (review), 256

MAGNET, deposition of iron on poles of a, 122
— electro, 560
Magnetic disturbances, 116
— spectra, projection of on a screen, 560
— — fixing, 428, 431
Magnetism, action of on electrified gases, 557
Magneto-electric clock, 428
— — counter, 429
— — machine, 427, 556
Malting, experiments on, 406
Manganese, alloys of, 405
— in vegetable kingdom, 401
"Manufacture of Russian Sheet-Iron" (review), 530
Marble, imparting yellowish hue to, 405
Marine engineering, 393
MARKHAM, C. B., "Memoir on Indian Surveys" (review), 368
MARTIN, J., "Microscopic Objects Figured and Described" (review), 259
Measuring machine, Whitworth's, 563
Meat, preserving, 547
"Memoir on Indian Surveys" (review), 368
Mène, M., manufacture of paper from wood, 129
Mercury, distinguishing from arsenic, 407
Mesopotamia, climate of, 284
Metallic spectra, 1, 59
Metals, origin of native, 542
— smelted in 1869, 137
Metalliferous deposits, 390
"Metallurgy," PERCY'S, 138
METCALF, G, lead smelting furnace, 138
"Meteoric Theory of Saturn's Rings" (review), 380
Meteorite, analysis of, 287
Meteorology, progress in, 281
Microscope, erecting binocular, 113
Microscopic crystals, 235
— — unusual form of, 275
— glass, cleaning, 274
— high power definition, 113
— objective, $\frac{1}{8}$th, 417
— objects, delineation of, 418
"Microscopic Objects Figured and Described" (review), 259
— — photographing, 274
Microscopical illumination, lime light for, 553
Microscopy, 112, 272
MILLER, W. A., "Introduction to the Study of Inorganic Chemistry" (review), 262
Mineral statistics, 135
Minerals, analysing, 127
— new, 132, 409
Mineralogy and chemistry, relation between, 286
Miners' Association of Cornwall, 390
— health and longevity of, 539
— scientific education of, 136
Mining in the United States, 389
— schools, 136
Mint, English, metallurgical operations at, 138
Mitrailleurs, trials of, 292
"Moabite Stone; A Facsimile of the Original Inscription, with an English Translation" (review), 371
MOHN, Professor, science of weather, 125
Molecules, ultimates, atoms, and waves, 170, 349, 461
Money, science of, 315
Monzonite, mineral, 543
Mortar, selenitic, 545
MORRIS, J., "Geology" (review), 258
MOTTERSHEAD and Co., automatic gas regulator, 115
Mounting microscopic objects, 112
Museum of Practical Geology, removal of, 390

"NATURAL History of Commerce" (review), 374
NAYLOR, W., railway brake, 293
Nephrite, or jade, 543
NETTLETON, Mr., substitution of aluminium for platinum in batteries, 115
New South Wales, diamonds in, 131, 287
NICHOLSON, H. A., "An Introductory Text-Book of Zoology for the Use of Junior Classes" (review), 370
— "A Manual of Zoology for the Use of Students" (review), 254
Nitro-glycerine, explosion of, 406
— properties of, 549
"Notes on the Natural History of the Strait of Magellan" (review), 255

OBJECT glasses and their definition, 277
OLIVER, Lieutenant, on British service ordnance, 1870, 1871, 364
Ordnance, British service, 1870, 1871, 364
— marine, heavy, 392
O'Reileyite, new mineral, 286
Organic matter in water, 127

ORMEROD, Dr., grinding microscopic sections, 272
Osm-iridium, fusion of, 115
Oxygen, combustion of, 406
— — — in hydrogen, 555
Oxyhydrogen blow-pipe for attacking safes, 424

PAGE of scientific history, 145
PALLISER, J. W., "A Complete Course of Problems in Practical Plane Geometry" (review), 533
"Papers on the Great Pyramid" (review), 372
PARFITT, E., sponge spicules, 113
Paris defences, 139
Patagonia, climate of, 282
Patent laws, our, 94
PENGELLY, W., where are the bones of the men who made the unpolished flint implements? 327
Percussion fuse for shells, 291
PERCY, Dr., "The Manufacture of Russian Sheet-Iron" (review), 530
Pharaoh's serpents non-poisonous, 407
PHILLIPS, J. A., British rocks and minerals, 286
Photographic balloon post, 110
Photographs, celestial, 415
Physical geography, 124
Pig-iron, materials used in the manufacture of, 540
Plastic material, new, 130
"Plates and Notes Relating to some Special Features in Structures called Pyramids" (review), 372
Pneumatic transmission, 305
Podura scale, on the, 274
— — markings on the, 553
Polariscope, new, 554
PONTON, M., molecules, ultimates, atoms, and waves, 170, 349, 461
— "The Beginning; Its When and How" (review), 527
"Power in Motion" (review), 530
PRICE, J., on testing rails, 396
Prisms, compound, 271
PRITCHARD, H. B., war science, 43
PROCTOR, R. A., "Light Science for Leisure Hours" (review), 378
— on the eclipse of last December, 227
— "The Sun; Ruler, Fire, Light, and Life of the Planetary System" (review), 263
PROCTOR, R. H., spectrum of aurora, 112
Psychic force, experimental investigation of, 339
— — researches on, 471
Puddling and heating furnaces, Howatson's, 541
Pumping hot liquids, 427
Pyramid of Egypt, the Great, 16, 177
Pyrometer, electrical, 119, 431
— SIEMENS's, 561

QUARTZ, crystalline form of, 408
Quinine, new base accompanying, 405

RAILS, testing, 396
Railway gauges, 141
Railways, narrow gauge, 545
— permanent way for, 293
Rainfall committee, report of, 123
— of Bengal, 281
RAMMELSBERG, Professor, analysis of Wootz steel, 290
— relation between chemistry and mineralogy, 286
RANKINE, W. J. M., on sea waves, 397
READE, Rev. J. B., death of, 114
Recorder, syphon, 120
Reflecting telescope, 107
Regelation, parallels to, 421
Registering spectroscope, 272
"Report to the Board of Visitors of the Royal Observatory, Edinburgh" (review), 372
Rifles, breech-loading, 392
— French and German, 290
ROBERTS, F. C., on the English Mint, 138
ROBINSON, W., "The Sub-Tropical Garden" (review), 383
RODWELL, G. F., "Dictionary of Science" (review), 257
ROLLWYN, J. A. S., "Astronomy Simplified for General Reading" (review), 535
ROST, M., plastic material, 130
RUTHERFORD, Mr., on celestial photography, 415

SABINE, R., and LATIMER CLARK, "Electrical Tables and Formulæ" (review), 376
Safety lamp, 137, 288
— — miners, 539
SALET, G., blue flame of sulphur, 114
Saltpetre, production of, 550
Sand, jet of, a mechanical agent, 359
SANSOM, A. E., theory of atmospheric germs, 153
SCACCHI, Professor, on dimorphine, 131
SCHONN, Dr., sodium for analysing minerals, 127
School of Mines, removal of, 390
Science of money, 315

Scientific instruction, report on, 409
Scotland, rainfall of, 124
Screw propellers, 394
Sea waves, 397
Sections, microscopic grinding, 272, 273
SEELEY, Professor, solubility of sodium in ammonia, 400
— solvent power of ammonia, 127
"Select Methods in Chemical Analysis (chiefly Inorganic)" (review), 381
Selenitic mortar, 545
Self fertilisation, 296
SELLARS, C., grinding microscopic sections, 273
"Series of Chemical Problems for Use in Schools and Colleges" (review), 382
Shafts, safety apparatus for, 288
Sheet-iron, Russian, 540
SHERMAN process for purifying iron, 391
Ship canals, 293
Ships, stability of, 544
SIEMENS's electrical pyrometer, 119
Signal lamp, self-lighting, 562
Signalling, luminous, 413
Silica, behaviour of in magnetic field, 542
Silk, black-dyed, spontaneous combustion of, 115
Silver, nitrate of, action of on copper, 551
— ornaments, ancient silver, 401
— plating, test for, 405
— reduction of chloride of, 407
— — — nitrate of, 551
SIMPSON, G., coal-cutting machinery, 288
SIMPSON, W., new safety lamp, 288
Singing telegraph, 117
SLACK, H. J., unusual form of microscopic crystals, 275
SMITH, J. L., analyses of Stewart County meteorite, 287
SMYTH, C. P., on the great pyramid of Egypt, 16, 177
— "Report to the Board of Visitors of the Royal Observatory, Edinburgh" (review), 372
SORBY, H. C., various tints of autumnal foliage, 64
Sodium as an explosive agent, 548
— for analysing minerals, 127
— solubility of in ammonia, 400
— solution of in ammonia, 127
Solar, corona, 227
— engine, 140
— protuberances, photographs of, 107
— spectroscope, 107
SOREL'S artificial stone, 412
Soundings, instrument for taking marine, 562
South African diamonds, 130
Spectra, chromolithographs of, 272
— double, 1
— of metallic compounds, 59
— magnetic, projection of on a screen, 560
Spectroscope, automatic, 110, 270, 413
— direct vision, 271
— ingenious application of, 272
— solar, 107
SPENCE, P., effect of cold on iron, 289
Spheroidal state, researches on the, 554
Spicules of sponge, 113
SPILLER, J., test for mixed fibres in fabrics, 129
Sponge fossil, 275
— spicules, 113
Spontaneous combustion, 115
Starch, action of sulphuric acid on, 401
— conversion of into sugar, 410
Steam-boiler legislation, 214
Steel and iron, effect of cold on, 288
STEPHENSON, J. W., erecting binocular microscope, 113
STEWART, B., "Lessons in Elementary Physics" (review), 261
Stone, artificial, 412
— caissons, 544
Storms, influence of firing of cannon on, 126
Storm warnings, 282
Strontian, rare minerals from, 408
Strychnine, test for, 128
"Student's Elements of Geology" (review), 256
"Sub-tropical Garden" (review), 383
Suckers on feet of Dytiscus, 418
Sulphide of carbon, congelation of, 424
Sulphur, blue flame of, 114
— deposit, new, 129
— in coal gas, 550
Sulphuretted hydrogen contaminated with arsenic, 552
Sun, fuel of the, 435
— Ruler, Fire, Light, and Life, of the Planetary System" (review), 263
Surveying, instruments for, 561
Sweden, iron producing districts of, 391
"Switches and Crossings" (review) 534
Syphon recorder, 120

TANGENT galvanometer, improved, 557

Tanning hides, rapid process of, 411
TARN, E. W., "The Student's Guide to the Practice of Measuring and Valuing Artificers Work" (review), 259
TATEM, Mr., mounting diatoms, 276
"Technical Educator" (review), 535
"Technical History of Commerce" (review), 536
Telegraph Engineers, Society of, 430
— singing, 117
— Steinheil's modification of, 431
Telegraphing under difficulties, 116
Telescope, Cook's achromatic equatorial, 561
— new reflecting, 107
Temperature, subterranean, 390
Testing rails, 396
THOMSON'S syphon recorder, 120
THORPE, T. E., "A Series of Chemical Problems for use in Schools and Colleges" (review), 382
TILGHMAN, B. C., on a new mechanical agent, a jet of sand, 359
TIMBS, J., "The Year Book of Facts in Science and Art" (review), 372
Tin, cells of, in microscopy, 553
Topaz, pyro-electric properties of, 542
Torpedoes, submarine, 292
TOSELLI, M., lasting properties of ice, 114
Townshend jewels, 133
Traction engines, 547
Tramway wire, 562
Transmission, pneumatic, 305
"Treatise on Magnetism" (review), 262
"Treatise on Terrestrial Magnetism" (review), 531
Tree, oldest known, 295
Tungstic acid, elastic compound of glue and, 129
Tunnel, Mont Cenis, 292
Two-prism spectroscope, 271
TYNDALL, J., "Fragments of Science for Unscientific People" (review), 379

ULTRAMARINE, artificial, 401
Uranus, spectrum of, 414

VACUUM tubes, stratifications in, 280
Variscite, mineral, 543
VARLEY, C. F., experiments in diamagnetism, 120
— passage of electrical currents through rarefied atmospheres, 279
— stratifications in vacuum tubes, 280
VARLEY, F., deposition of iron on poles of magnet, 122
VARLEY, O, improved Daniell's battery, 122
VARLEY'S singing telegraph, 117
Varnish for metals, 411
Venom of scorpion, 128
Viaduct, the Kistnah, 394
Victoria, mineral statistics of, 538
Volga, ice in river, 284

WALENN, W. H., electro-deposition of brass, 116
WALZ, Dr., filter pump, 129
War science, 43
WARD, Dr., on the Podura scale, 274
Water, force exerted by freezing of, 555
Waterproofing fabrics, 548
WATSON, H. W., "The Elements of Plane and Solid Geometry" (review), 531
WATTS, W. M., on double spectra, 1
Weather, barometrical predictions of, 123
Weighing machine, hydrostatic, 562
WEIR, R., on submarine torpedoes, 292
WENHAM, F. H., on object-glasses and their definition, 277
WENZELL, W., test for strychnine, 128
WEST, C., "On some Disorders of the Nervous System in Childhood" (review), 377
WIEDERHOLD, Dr., Chinese lacquer, 130
WILLIAMS, M., on burnt iron, 391
WILLIAMS, W. M., the fuel of the sun, 435
Winkworthite, mineral, 542
WINLOCK, Prof., spectrum of aurora, 112
WOODWARD, J. J., photographing microscopic objects, 274
Wootz steel, analysis of, 290

YEATS, J., "The Natural History of Commerce" (review), 374
— "The Technical History of Commerce" (review), 536
YOUNG, Prof., observations of the solar protuberances, 107
— photographs of solar protuberances, 107

ZINC as fuel, 421
ZIRKEL, Prof., fluid cavities in crystals, 285

LIST OF PLATES IN VOLUME I. (N.S.).

	PAGE.
DOUBLE SPECTRA (CHROMOLITHOGRAPH)	1
DOUBLE SPECTRA	11
SPECTRA OF CERTAIN METALLIC COMPOUNDS	63
STEAM BOILER EXPLOSION	225
THE CORONA. ECLIPSE, DECEMBER, 1870	242

LIST OF WOODCUTS IN VOLUME I. (N.S.).

Scott Gun-Carriage	47
Moncrieff Gun-Carriage	48
Electric Torpedo	57
Solar Protuberances (8 *figures*)	107 to 109
Automatic Arrangement of Prisms for Spectroscope	110
Varley's Singing Telegraph (3 *figures*)	117, 118
Siemens's Electrical Pyrometer	119
Thomson's Syphon Recorder (3 *figures*)	120
New Experiments in Diamagnetism (4 *figures*)	121
Improved Daniell's Battery	123
Filter Pump	129
Corpuscles obtained from Atmospheric Air	156
Fructification of Penicillium crustaceum	159
Spores of Penicillium crustaceum Bursting in Water	159
Cryptococcus in Various Grades of Development from Penicillium	160
Milk Ferment".	160
Acetic Ferment in Course of Development	161
Acetic Ferment from Surface of Stale Beer	161
The Corona. Eclipse, December, 1870	240
Illustration to Objection to Oudemann's Theory of the Coronal Radiation	246
Ascent of Soap-bubbles Filled with Hydrogen	260
Sun Spot presenting the Appearance of Cyclonic Motion	266
Vast Scale of the Larger Solar Prominences	266
A Group of Solar Prominences	267
Ditto Ditto ten minutes later	268
Grubb's Automatic Spectroscope	270
Adaptation of the Immersion Principle for Illuminating Microscopic Objects (2 *figures*)	273
New Microscope Lamp (3 *figures*)	276
Arrangement of Percussion Fuse	291

PAGE.

Experimental Investigation of a New Force (3 *figures*) . 342, 343, and 345
Yucca pendula. 385
Sheltered Dell with Tree Ferns and other Stove Plants 386
Preparing Beds for Sub-Tropical Plants 386
Tree-Fern 388
Examination of Ancient Silver Ornaments 403
Arrangement for Heating Crucibles by Gas 404
Spectrum of Uranus 414
Prism of Calc-spar 417
Binocular Eye-Piece. 418
Experiments on Psychic Force (13 *figures*) . . . . . 479 to 491
Captain Morgan's Proposed Monster 15-inch Breech-Loading Gun . 522
Ditto Ditto ready for Firing 523
Ditto Ditto after Discharge 523
Cone of Porous Earthenware as a Substitute for the Paper Filter . . 550
Illustration of an Experiment Confirming the Theory of the Spheroidal State 554
Arrangement for Showing the Burning of Oxygen, Air, Chlorine, &c., in Hydrogen, Burning Gas, or Hydrocarbon Vapours 555
Large Induction-Coil 558
Morton's Secondary Condenser 559
Apparatus for Piercing Glass Blocks 560
Apparatus for the Projection upon a Vertical Screen of the Images of Objects 561

END OF VOLUME I. (N.S.).

Printed at the Offices, 3, Horse-Shoe Court, Ludgate Hill, London, E.C.
